

Where and why do we deploy the M³-platform (Macq Mobility Manager)?

The M³-platform is a powerful software interface package providing **ultimate innovative traffic management tools** for Smart Cities, Highways and National Police. All data retrieved via ANPR cameras or other various equipment in the field help to provide all sorts of important information to be able to perform efficient traffic management. M³ contains and offers **a wide range of applications** as shown below :

CITIES, ROADS & HIGHWAYS

Restricted Traffic Zone

VMS

Mobility Portal

Carpooling

Parking
